CURRENCY EQUIVALENCES
(As of 30 August 2021)
Currency Unit – Cambodia Riel (KHR) to United States Dollar (USD)
KHR 4,000.00 = USD 1.00

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.
I. INTRODUCTION

A. SCOPE AND PURPOSE

1. This Land Acquisition and Resettlement Plan Implementation Compliance Report (LARPICR) is for land acquisition and resettlement under the 230kV Transmission Line – Section III of Solar Park Project. The purpose of this LARPICR is to verify that affected persons have received compensation and other allowances in accordance with entitlements defined in the approved and published Updated Land Acquisition and Resettlement Plan for section 3 by September 2021.

B. PROJECT OVERVIEW

2. ADB worked with EDC to develop a National Solar Park Project (the Project) where power of up to 100 MW is procured from solar photovoltaic (PV) power plants of the private sector through a competitive tendering process. The Project aims to (i) demonstrate the ability of a large-scale solar PV to produce solar energy at a competitive price; (ii) provide technical benefits to the national grid; and (iii) replace the fossil-fuel and hydropower generation in the future. The expansion of solar energy production will help diversify the power generation mix and complement the existing base of hydropower plants to meet daytime peak demand and dry season shortages, as well as increase the percentage of clean energy supply, in line with the RGC stated greenhouse gas emissions reduction targets. The Project is the first of its kind in Cambodia and builds on lessons learnt from ADB Private Sector Operations Department’s financing of a 10 MW solar plant at Bavet, Svay Rieng Province in 2016.

3. The Project has two outputs including:

- **Output 1**: Solar Park and transmission interconnection constructed. The Project will support EDC in constructing a 100 MW solar power park in Kampong Chhnang Province and a transmission interconnection system to GS6 near the Phnom Penh demand center to supply power to the national grid. The park will initially consist of 100 hectares (ha) of land; associated construction works (i.e., fencing, roads, and drainage systems); common facilities; and supporting infrastructure to accommodate 60 MW of solar photovoltaic plant capacity. The transmission interconnection infrastructure comprises (i) the 100 MW capacity pooling substation at the solar park, with two 50-megavolt-ampere transformers (and room for two additional transformers); switchgear; an ancillary system; and controls; (ii) a supervisory control and data acquisition system compatible with EDC’s requirements, advanced forecasting tools, and expanded information and communication technology applications; (iii) a dedicated 40-kilometer 230-kilovolt double circuit overhead transmission line between the solar park substation and GS6; and (iv) two new bays with switchgear at GS6.

- **Output 2**: Capacity of EDC in solar power plant construction and operation, Project design and supervision, grid integration and competitive procurement strengthened. The project will strengthen EDC’s capacity to design, construct, and operate solar PV plants and solar parks (including management of environmental and social safeguards issues). The project will also enhance EDC’s capacity to procure competitively bid independent solar PV plants, and to adopt energy storage systems and other measures to integrate intermittent renewable energy into the national grid.

4. The Project includes two following components:

- **The solar park**: The solar park is constructed in the border area between Kampong Chhnang and Kampong Speu Province, near the Phnom Penh demand center.

- **The transmission lines**: An approximately 40-kilometer (km) of 230kV double circuit overhead power transmission line is planned to construct. It will connect the solar park substation and the nearest grid substation (GS6) in Kampong Speu province.
5. Land acquisition will be required only for Output 1, where land is needed for the construction of two components: (i) the solar park; and (ii) the approximated 40 km 230 kV double circuit overhead line between the pooling substation and GS6. A total of 100 ha of land will be acquired permanently for construction of common facilities of the solar park and for the first 60 MW of solar plant capacity in the park which is located in the border area between Kampong Speu and Kampong Chhnang Provinces. This area will be acquired using a negotiated settlement. EDC has agreed with ADB on the consultation process, policies and laws applicable to willing buyer-willing seller transactions, the third-party validation, mechanisms for calculating the replacement cost of the affected land and assets and the record keeping requirement.

C. SUBPROJECT DESCRIPTION

6. The 40km of power transmission line is planned to run through Thpong and Odongk Districts in Kampong Speu Province and a small part up to the solar park in Tuke Phos District in Kampong Chhnang province. The route is divided into three sections. Section 1 starts from the first tower at GS6 interconnection until IP2 tower in Khsem Khsan commune, Odongk district in Kampong Speu and Section 2 is located in the communes of Khsem Khsan, Trach Tong, Mean Chey and in Rung Reung. A total length of the transmission line under Section 1 and 2 is 23.166km. Section 3 starts from IP8 to the solar park substation and traverses two communes including Prambei Mum commune, Thpong district, Kampong Speu province and Kbal Teuk commune, Teuk Phos district, Kampong Chhnang province. The total length of transmission line under Section 3 is 16.834km. The route of the transmission line is shown in Figure 1 below.

According to the technical guidelines of EDC, the COI of the 230kV transmission line of this Project, however, is defined as 20m width (10m on each side from a central tower/pole) for the transmission line. Land within the COI of the transmission line will not be permanently acquired but restrictions such as limited height of structures/buildings within the COI to 3 meters – and trees planted within the COI which exceed 3m in height will be cut-off. The Right-of-Way (ROW) of the transmission line is equal or greater than 20m (≥10m on each side from a central tower/pole). The trees within the ROW which are higher than 3m will also be cut-off and compensated for. Justification on the reasons for COI of 20m width of the transmission line by were implemented in 2017 by EDC and sent an official letter No.3817 EDC-CPPD to ADB dated on 31st May 2021 for clarification on EDC’s policy related cost to high voltage transmission line project.

II. ANTICIPATED IMPACTS & PLANNED ENTITLEMENTS

7. Updated Land Acquisition and Resettlement Plan (LARP) for section 3 by September 2021 concluded there would be (i) no severe impacts on productive land or income generating assets (ii) no restriction of community/public services, and (iii) no physical displacement of people will take place.

7.1 Affected Land Area: Affected land study for a 230kV high-voltage transmission line with a tower-type steel tower poles of 230kV shows that the total land required for the site of the transmission tower is generally farmland and residential land. The area to be procured and the LARP identified involuntary resettlement impacts associated with the section 3 of the transmission line shown in the table below.

7.2 Impacts on Trees: Within the 30m ROW the total number of trees was found to be 2,671 (see Table 9 below) for both section 1, 2 and 3. EDC will compensate these affected trees that have to be cut down within a ROW of 30 m with a full price based on RCS.

8. The calculated cost for compensation and assistance for the construction of Section 3 transmission line is $371,032.66; of which, the compensation and assistance amount to be paid to 100 AHs who will be affected by land acquisition for construction of 32 power towers and the transmission line is $284,254.74; cost for the CAP implementation is $1,155; the administrative cost is $57,081.95; and the contingency is $28,540.97. The table below presents the breakdown of the calculated cost for compensation and assistance of the Project, see Table 4.

---

¹ This’s included the 17 power towers under CAP, which increased compensation from USD 23,000.50 to USD 34,695.50 coz the justification of land affected from agricultural land to residential/village land and road’s situation of the land.

² It is also included full among for the land use under COI of the 17 power towers under CAP for restriction land use within COI, which increased compensation from USD 187,446 to USD 291,894.30 coz the justification of land affected from agricultural land to residential/village land and road’s situation of the land.

³ Compensation for Affected Trees increased from USD 36,290 to USD 43,721.50 coz the justification of size of the trees (Big, Medium and Small) and increasing number from 1,021 tress to 1,033 tree and no payment for affected crop during construction period.

</tr>
</tbody>
</table>

³ Allowance for income restoration allowance increased from USD1,800 to USD 2,400 coz increasing of vulnerable AHs from 9 AHs to 12 AHs.

⁴ Allowance for vulnerable households increased from USD2,700 to USD 3,600 coz increasing of vulnerable AHs from 9 AHs to 12 AHs.
IV. VARIATION BETWEEN PLANNED/ACTUAL IMPACTS & ENTITLEMENTS

Actual expenditure on compensation for AHs and all allowances comparison is a little bit higher than the plan because of changing for the land use in land document (Soft and Hard land titles), situation affected of the land (No road, Castle road, Village/Commune road and National road), increasing of 3 AHs (Distribution land from parents to their children), 3 AHs for vulnerable AHs and 3 AHs eligible for IRP as following in Table 6.

Overall, 5,278.64$ was increased from the planned budget expenditure; in particularly, increased 155% for compensation on loss of land, 120.47% on loss of trees and 133.33% allowance for Vulnerable AHs and IRP respectably. However, non-actual budget expenditures on loss of crops, it was responsible by contractor and administrative cost and contingencies were responded by annual budget of EDC as shown in Table 7.

*Note:* For the compensation on crops, it was carried out by contractor, while allowances were increasing from USD2700 to USD3600 for vulnerable, and from USD1800 to USD2400 for IRP.

V. IMPLEMENTATION OF AGREED MEASURES TO MINIMIZE IMPACT

10. The LARP required the civil works contractor to avoid disturbance to the communities located along the section 3 of this transmission line. The contractor was also obliged to follow the Project Resettlement Framework for camps, material storage and other ancillary land disturbance.

11. Monitoring by the Project Management Office (PMO) during construction works ensured these commitments were upheld and no grievances were received on these matters.
VI. INFORMATION DISCLOSURE, CONSULTATION AND PARTICIPATION

12. ADB’s SPS (2009) requires carrying out meaningful consultation with APs and communities beginning early in the Project preparation stage and on an ongoing basis throughout the Project cycle and in line with safeguard policies of Involuntary Resettlement. Public consultations were undertaken accordingly during the Project planning and design phases to consult with Project stakeholders, especially with the people to be affected by the transmission line construction.

13. The objectives of consultation and participation of local people are to (i) ensure the participation of APs and local community into the progress of design, preparation and making decision process of the Project; (ii) disclose all the information related to APs; (iii) gather the concerns, opinions and suggestions of APs; (iv) ensure that all of APs will be announced any decisions related directly to them, especially their income and livelihoods; and (v) ensure the transparency of land acquisition, compensation, assistance and resettlement carried out under the Project. Project stakeholders include APs, community chief, local authorities of Kampong Chhnang and Kompong Speu provinces, districts and communes in the Project areas; and relevant agencies consisting of EDC, SEPRO and PMO-1.

14. It is same for section 3, there were two rounds of public consultation meeting was held in Odongk district in November 2020 with the participation of representatives of councils of districts and communes where the transmission line traverses; district sectoral offices such as environmental office, rural development office, etc. and the village chiefs. The number of the participants in this meeting is 67 and two of those are females. The second round of public consultation comprised 11 public consultation meetings held intermittently at two project communes from May to August 2021. The meetings were carried out after the completion of DMS in each commune. A small number of local people was invited to each meeting and in some project villages, more than one meeting were organized to ensure the dissemination information as well as the participation of local people in consultation activities. These actions were to prevent the Covid-19 explosion following the guidelines of Ministry of Health. A total number of the meeting participants was 145, of which 47 attendees were females, accounting for 32.41%. The meeting participants included the representatives of local authorities, village chiefs and AHs. In the meetings, the participants were shared and discussed the information of the Project including (i) the detailed engineering design of the transmission line construction; (ii) the scope of land acquisition based on the DMS results; (iii) the principles of land acquisition, compensation, assistance and resettlement (such as cut-off date, eligibility, proposed entitlements, etc.); (iv) the proposed implementation schedule of land acquisition, compensation and assistance and civil works; and (v) the proposed project-level GRM.

15. In addition, two FGDs were organized with one group of affected women and one group of affected men in Prambei Mum commune. A total of 14 participants attended the FGDs, of which four (04) participants were females and 10 other attendees were males. During the FGDs, the participants discussed various information related to (i) livelihoods of households in project communes such as occupation, income, poverty and difficulties that local people faced; (ii) positive and negative impacts caused by the construction of 32 power towers and transmission line; (iii) proposed measures of the APs to mitigate the negative impacts on the Project; and (iv) opinions, suggestions and concerns of the APs about the proposed Project design, tentative implementation schedule, and the Project impacts. The PIB was prepared and copies of the PIB were provided to all the participants during the public consultation meetings in Khmer. The summary along with the entitlement matrix and list of AHs will be further disclosed to stakeholders and AHs.
VII. GRIEVANCES REDRESS MECHANISM

16. There are 4 levels of the GRM that including from the lowest level being the Grievance Redress Committee (GRC) at the village/commune, district, provincial level and the highest level being the court at the National level.

17. For section 3, it was one complaint (1 AH) which reached a resolution in provincial level.

18. Establishment the Grievance Redress Mechanism of EDC to solve the impacts of land, tree and household resettlement to villagers in the project of 230kV Power Transmission Line connecting from Northern Phnom Penh Substation (GS6) to Tuek Pos district Substation in Kampong Chhnang. This GRM has duties:

   - Make planning, lead, mark locations on map and on actual land locations, report to get approval from the H.E. Delegate Minister to the Prime Minister Managing Director of EDC.
   - Make planning, lead, consult with impacted people before detail measurement survey (DMS), contract agreement, and compensation.
   - Guarantee all AHs who settled illegal/legal on land received fairly for compensation and allowances.
   - Awareness on GRM to all authority and AHs.
   - Mitigate all risks to negative impacts on health and safety for the whole community in the project’s area.
   - Facilitate, received and resolve all complaints for AHs in GRM.
   - Arrange EMP, train and prepare reports to all related stakeholders to mitigate negative effect on environment and social safeguard.
   - Manage and settle down all resettlement issues in GRM.
   - Cooperate with the sub-committee of provinces Kampong Speu/Kampong Chhnang to solve all problems

19. Establishment the Grievance Redress Mechanism of relevant provinces (Kompong Chhang and Kompong Spue Provinces) to settle impacts on buildings, households, land, and fruits trees, caused by the project of 230kV Power Transmission Lines connecting from the Northern Phnom Penh Substation (GS6) to the solar power substation for each province relevant villages.

20. AHs were informed about the GRM as part of the household consultations during project preparation including when reviewing individual compensation agreements and taking receipt of compensation payments.

21. Civil works contractors were briefed on the GRM and required to assign staff to receive, report and follow-up on grievances received from local communities.

22. A workshop to strengthen the GRM and review the project compliance were carried out together with public consultation (two rounds) during the preparation of Updated LARP for Section 3 transmission line with representatives of local authorities (communal and district levels), local communities and AHs. The first meeting (first round of public consultation) was held in November 2020 in Odongk district. Then the second round of public consultation comprised 11 public consultation meetings held intermittently at two project communes from May to August 2021. In the meetings, the participants were shared and discussed the information of the Project including (i) the detailed engineering design of the transmission line construction; (ii) the scope of land acquisition based on the DMS results; (iii) the principles of land acquisition, compensation, assistance and resettlement (such as cut-off date, eligibility, proposed entitlements, etc.); (iv) the
proposed implementation schedule of land acquisition, compensation and assistance and civil works; and (v) the proposed project-level GRM.

23. As practiced, the GRC includes the relevant local commune or village chiefs may assist the affected persons in filing complaints. The designated commune officials shall exercise all efforts to settle complaints and issues at the commune level through appropriate community consultations. All meetings shall be recorded in each grievance process and copies shall be provided to the affected persons. All AHs had received all compensation in section 3.

24. **Expropriate Law Enforcement:** Only one affected household was under the law enforcement and the main reason for not accepting the compensation because the landowner would like to justification alignment right of way in his land. However, the landowner accepted the payment after finishing construction power tower and string ROWs.

**VIII. APPENDICES**
## Appendix A: Breakdown of Compensation and Allowances Paid and Planned

### A.1 Actual Payment

#### A1.1 Land affected by Towers

| #  | Location | 1/2/3 | 4/5/6 | 7/8/9 | 10/11/12 | 13/14/15 | 16/17/18 | 19/20/21 | 22/23/24 | 25/26/27 | 28/29/30 | 31/32/33 | 34/35/36 | 37/38/39 | 40/41/42 | 43/44/45 | 46/47/48 | 49/50/51 | 52/53/54 | 55/56/57 | 58/59/60 | Total

Due Diligence Review on Land Acquisition and Resettlement for Households Affected by the Construction of 17 Power Towers under Section 3

A Resettlement Due Diligence Review (DDR) of how the land acquisition, compensation and support for households affected by the construction of 17 power towers under Section 3 transmission line was carried out in August 2021. A total of 74 households (342 affected persons – APs) were affected by the construction of 17 power towers under Section 3 transmission line and received compensation and assistance payment in July 2021. The objectives of the DDR are (i) to determine if the land acquisition, compensation, and assistance for the AHs are implemented in compliance with the entitlements specified in the Updated LARP for Section 3 transmission line; (ii) to identify any aspects where discrepancies exist between the findings of the DDR and provisions of the Updated LARP for the Section 3 transmission line; and (iii) propose corrective actions to address the gaps identified.

During the DDR implementation, documents related to land acquisition, compensation and recorded by SEPRO/EDC and PIC and payment vouchers of the AHs were collected and reviewed to gather data on the number of AHs, type of impacts, applied compensation unit rates (results of RCS-January 2021) and assistance provided to the households, information disclosure and public consultation activities carried out, as well as the information concerning redressing complaints and/or grievances raised by the AHs (if any).

There were 74 households (342 APs) affected by the construction of 17 power towers. All of those reside in Prambeı Mum commune, Thpong district. Among the 74 AHs (342 APs), 49 AHs (228 APs) had land restricted on land use; 24 APs (111 APs) who have both land within the COI of transmission line and being restricted on land use and land permanently acquired for the construction of 17 power towers; and one (01) AH (03 APs) was with loss of trees only. The DMS results showed that a total of 3,825 m$^2$ of land was permanently acquired including 1,800 m$^2$ of land for other annual crops; and 2,025 m$^2$ of paddy land. There were 24 households (111 APs) with land permanently affected, of which 11 AHs (45 APs) were with paddy land permanently acquired; and 13 AHs (66 APs) had land for other annual crops permanently recovered. On the other hand, the area of land within the COI that would be restricted on land use was 111,493 m$^2$. This area covered 43,260 m$^2$ of paddy land owned by 30 AHs (132 APs); and 68,233 m$^2$ of land for other annual crops of other 43 AHs (207 APs). A total number of 73 households (339 APs) had land within the COI of the transmission line and being restricted on land use.

Apart from impacts on land, a total of 155 trees of 38 AHs (157 APs) were cut down. The majority of the affected trees were mango trees with 96 trees out of total 155 affected trees. No structures as well as business activities of households were affected by the construction of 17 power towers and transmission line.

Among the 74 AHs who received the compensation and assistance, three (03) households (10 APs) were vulnerable AHs including one (01) female headed household with dependents (4 APs); and two (02) elderly-headed households with no other means of support (6 APs). None of the 74 AHs would be severely affected as all of the AHs lost less than 10% of total productive landholding/income generating assets of the household and no AHs had to relocate.

Summary of land acquisition and resettlement impacts caused by the construction of 17 power towers of Section 3 transmission line is presented in the following table.
### Summary of Land Acquisition and Resettlement Impacts Caused by the Construction of 17 Power Towers of Section 3 Transmission Line
